

REACT TO LOGS ON STOCK MARKET Recovery From Depression Following San Francisco Calamity Has Run Course.

COPPER STOCKS GO DOWN News of Financial Affairs Uniformly Favorable - Money Market Continues Easy

(By Associated Press.) NEW YORK, May 14.—The early stock market of to-day gave no evidence of a change from the advancing tendency of last week, but before the day was over a clearly defined reaction developed. An explanation which seemed sufficient to the professional trading review was that the recovery from the depression following the San Francisco calamity had run its due course.

Professional traders have been feeling for the top of the market for a number of days by making the tentative short sales and trying to turn the market downwards. There was no striking new development in the situation to-day to warrant a renewal of positive depression to the speculative outlook. The news of a large temporary loan by the Pennsylvania Company, and the reports current of a high rate of interest to be paid on the loan, called renewed attention to the heavy capital requirements that yet to be met in the money market. The relaxation in the money market following the enormous sudden demand for cash precipitated by the San Francisco losses has served to build up an inflationary feeling amongst speculators, and the closing market in fact was a reaction from the inflationary feeling.

An incident of the day which affected speculative sentiment unpleasantly was the reduction in the dividend by the J. & J. Silver and Copper Company, a minor subsidiary of the Amalgamated Copper Company. This operated to interrupt very heavy speculative buying in the copper group, based on the excited advance in the price of copper metal and copper mining stocks in London. The strength in this group was being used as the mainstay of the market, to hold it against the sell-off to take profits which was going on at other points. When the copper stocks gave way the entire market yielded.

News of financial affairs continued uniformly favorable to-day. Rates for money worked easier, and the London market was cheerful over the prospect of declining money rates there. The downward drift of prices of stocks continued through the afternoon, and the closing was heavy, with a slight rally. The total sales of stocks for the day amounted to 1,047,000 shares.

NEW YORK, May 14.—The cotton market was quiet during to-day's trading session, but ruled generally steady in the late trading. The close was steady at an advance of 600 points. Sales of the day were estimated at 10,000 bales. The opening was steady in receipt of higher cables than looked for in receipt of damage to young cotton as a result of the frosts reported last week in the eastern belt. New Orleans and Kentucky reports of 4 1/2 points right after the call on these items, which were reflected in a demand for New Orleans and Kentucky. The selling of the same character as that noted in the early part of the day. The bull leaders made a little attempt to support the market, but during the middle of the day prices fell off a point or two from the top level.
